-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 23 November 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 19-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim s 19-21 recites the limitation "said value" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-6, 8-41, 43-72 and 75-88 are rejected under 35 U.S.C. 102(b) as being anticipated by Redden, U.S. Patent No. 5,504,938.

Regarding claims 1-6, 8-41, 43-72, 75-88, Redden discloses an apparatus/transmitter/controller/method for generating a signal for wireless transmission comprising signal generating means for receiving data and generating a signal containing received data for wireless transmission, and control means for controlling the

Art Unit: 2617

data carrying capacity of said signal (col. 2, lines 4-23; figures 2-4 and accompanying text).

Redden discloses control means adapted to control at least one parameter (signal quality, power, amplitude of a signal, etc., which reduces antenna pattern) defining the data carrying signal (col. 7, lines 12-60). Redden further discloses encoding means via controller 84 and processor 60 (col. 7, lines 12-60).

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 7, 42, 73 and 74 are rejected under 35 U.S.C. 103(a) as being unpatentable over Redden in view of well known prior art.

Regarding claims 7, 42, 73 and Redden discloses the apparatus/transmitter/controller/method of claims 6, 41 and 72 as described above.

Redden, however, fails to disclose error measurement for use in controlling the capacity of the system.

The examiner, however, contends that such a feature is well-known in the art, and the examiner takes official notice as such.

Art Unit: 2617

At the time of invention, it would have been obvious to a person of ordinary skill in the art to modify Redden with the teachings of well-known prior art in order to reduce interference in the system.

### ***Conclusion***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tiedemann, Jr. et al, U.S. Patent No. 5,914,950, discloses a method and apparatus for reverse link rate scheduling.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Temica M. Beamer whose telephone number is (571) 272-7797. The examiner can normally be reached on Monday-Thursday (alternate Fridays) 7:00am-4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold can be reached on (571) 272-7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
